Sheep Performa Maintainer

Supplementary feed to assist in maintaining dry stock

Sheep Performa Maintainer is designed as a maintenance supplement to hold condition of dry stock.

This product is not ideal for fattening lambs or pregnant ewes.

Sheep Performa Maintainer can be beneficial when:

- Available paddock feed is limiting;
- Maintaining dry stock

Sheep Performa Maintainer contains a full complement of macro and trace minerals, vitamins, and additives to support animal health and performance.

This product DOES NOT contain urinary acidifying agents. It may not be suitable for feeding to rams and wethers.

Sheep Performa Maintainer can be trail fed at the desired feeding rate. Always introduce gradually, and increase feeding rate gradually until desired feeding rate is achieved, and feed in conjunction with suitable forage and effective fibre (eg. cereal straw) sources, and clean, fresh water.

Feeding rates for **Sheep Performa Maintainer** will vary depending on the availability of other feeds, ewe condition, the number of lambs, and other environmental factors.

When trail feeding **Sheep Performa Maintainer** remember to trail the pellets out over sufficient distance to reduce competition, remembering to gradually increase the amount fed each feeding.

Calculated Analysis (per Kg)¹

ME Ruminant:	10.0 MJ/kg
Crude Protein (CP):	10%
CP Equivalent:	2.50%

Sheep Performa Maintainer

Supplementary feed to assist in maintaining dry stock

Product Features:

Vitamins and Minerals

- Vitamin A – an important vitamin to support healthy growth and development, Vitamin A can often be limiting on diets based on concentrates, hay and silage.
- Vitamin E – involved in many physiological functions including reproduction, immune function, muscle and nerve function. Vitamin E also acts as an antioxidant in conjunction with Selenium.
- Vitamin D – an important vitamin involved in absorbing and maintaining blood calcium levels.
- Vitamin B1 – normally produced in the rumen, this can be limiting in high concentrate diets, increasing the risk of polioencephalomalacia unless supplementation is offered.
- Trace minerals including Chromium, Cobalt, Iron, Iodine, Manganese, Selenium and Zinc.
- Macro minerals including Calcium, Phosphorus, Magnesium, Sulphur, Potassium, Sodium and Chloride.

Organic Minerals

- Supplementing animals with organic minerals has long been recognised to improve animal health and performance. **Sheep Performa Maintainer** contains:
 - Organic Zinc - for general growth and metabolism; normal bone and cartilage development; maintaining the integrity of skin and mucous membranes, hair and hooves and in wound healing.

Rumen Support

- Rumen buffering is achieved using **Acid Buf®**, a natural product that buffers the rumen against pH changes longer than traditional buffers such as sodium bicarbonate or sodium bentonite. Acid Buf® also supplies calcium and magnesium, reducing the amounts of macro minerals required to meet the desired mineral targets.

Ingredients

Sheep Performa Maintainer is manufactured from a selection of the following ingredients:

- Wheat, Barley, Oats, Maize, Lupins, Peas, Beans, Canola Meal, Soybean Meal, Almond Hulls, Grape Meal, Palm Kernel Extract and products derived from these ingredients. Limestone, Salt, Dicalcium Phosphate, Mono Dicalcium Phosphate, Gypsum, Magnesium Oxide, Magnesium Sulfate, Sodium Bentonite, Urea, Acid Buf®, ZinPro® 180, Flavouring, Molasses, Vegetable Oil, Bredol, Sheep Vitamin & Trace Mineral Premix.
- Ingredients may be altered based on availability.

Packaging and Availability

Sheep Performa Maintainer is available as a pellet in:

- **Bulk** – minimum order 4 tonne
- **Bulka Bags** – 1000kg
- **20kg Bags** – through selected retail outlets
