Dairy Performa Lactation Feeds

High performance pellets and grain mixes for lactating dairy cows

Dairy Performa Lactation Feeds are a high quality pelleted stockfeed, available in a range of protein levels to help meet the nutritional requirements of dairy cattle throughout the lactation when fed as a component of a complete diet.

Dairy Performa Lactation Feeds are manufactured from a range of cereal grains, legumes, protein meals, vitamins, minerals and other ingredients to supply the cow with quality energy and protein sources that complement the feeds typically available on dairy farms.

On-Farm Nutrition Service & Custom Formulations

Feed costs are the major cost faced by most dairy farms. Understanding and managing these cost effectively, particularly when faced with challenging economic and environmental conditions, is crucial for profitability.

Counterpoint Stockfeeds offer all bulk dairy customers a complimentary on-farm nutrition and feed budgeting service. Our qualified Consulting Nutritionists are available at any time to discuss the impact of different feeding strategies and feed purchasing decisions on the production and profitability of your farm.

When used in conjunction with our complimentary on-farm nutrition and feed budgeting service, **Dairy Performa Lactation Feeds** are an integral component of modern, profitable dairy farming.

Dairy Performa Lactation Feeds can be fed at rates up to 8 kg/head/day, as a component of a complete diet including pasture and other forage sources, effective fibre, and clean, fresh water.

Calculated Analysis (per Kg)¹

ME Ruminant:	12.0 MJ/kg
Crude Protein (CP):	12.0% - 21.0%
CP Equivalent:	Nil - 2.75%
Fat (typical):	2.50%
Starch (min):	40.0%
NDF (max):	25.0%
Calcium:	1.00%
Phosphorus:	0.40%
Magnesium:	0.30%
Salt (max added):	1.0% ²
Urea (max added):	1.00% ²

Dairy Performa Lactation Feeds

High performance pellets and grain mixes for lactating dairy cows

Product Features:

Vitamins and minerals

- Vitamin A - an important vitamin to support healthy growth and development, vitamin A can often be limiting on diets based on concentrates, hay and silage.
- Vitamin D - a crucial vitamin involved in calcium homeostasis and immune function.
- Vitamin E – involved in many physiological functions including reproduction, immune function, muscle and nerve function. Vitamin E also acts as antioxidant in conjunction with Selenium.
- Trace minerals including Cobalt, Iron, Iodine, Manganese, Selenium, and Zinc.
- Macro minerals including Calcium, Phosphorus, Magnesium, Sulphur, Potassium, Sodium and Chloride.

Rumen Health

- **Acid Buf®** is included to support rumen pH, reducing the risk of acidosis more effectively than sodium bicarbonate.
